c. Teaching Innovations

i. Major Programs Established

I developed a sexual health and reproductive epidemiology (SHARE) research group consisting of advanced doctoral students and post-doctoral mentees. The purpose is to encourage collaboration within the discipline, as well as across disciplines within the School of Public Health. Additionally, the goal is to increase productivity for our doctoral students and post-doctoral mentees. The group currently consists of 8 students and 4 faculty across disciplines within the SPH and outside the SPH (e.g. Anthropology and Psychology).

ii. Course or Curriculum Development

I redesigned EPIB/HLTH301 (Epidemiology for Public Health Practice). This course evolved from a small, intimate classroom setting of 18 in the Fall of 2015 to a class size of 233 in Spring 2019. As such a redesign was crucial to maintaining the integrity of the Public Health Science program, as well as the School. The redesign included case-based learning in efforts to reinforce course material in a more interactive manner, as well as clicker-type quiz questions throughout the lectures to engage students in applying their current knowledge to problem-solving epidemiologic “problems.”

e. Mentorship

i. Junior Faculty

Rodman Turpin, PhD

Rodman is currently on tenure track as an assistant professor in the Department of Global and Community Health at George Mason University.

Rodman and I currently work on several projects; his K01 award project, for which I serve as mentor. Additionally, he is Co-Investigator for a project for which I am MPI examining syndemic and non-communicable diseases among sexual and gender minority folks in Nigeria. Additionally, he and I work on. A pilot project funded by UCSF (NIDA) examining syndemic burden and mental health among aging Black women living with and without HIV in the US.

Shantrel Candidate

Shantrell is currently an assistant professor at University of Florida. She is a recipient of a K01, for which I serve as a mentor, as well as an RWJ Health Scholars for Equity fellow and I am her primary mentor on those projects. All projects examining substance use and syndemics among sexual and gender minorities in Florida.

Doctoral Students

Sonica Sayam, MPH (Chair)

Sonica is an advanced doctoral student who is working on research around aging and Alzheimer's disease and racial/ethnic disparities in such.

Candice Owusu, MPH (Chair)

Candice was awarded a prestigious CDC Rise Fellowship where she works on studies on HIV among Latino and Black MSM. Candice also works on vaginal microbiome research with Drs' Rebecca Brotman and Johanna Holm at UMN Institute for Genomic sciences. Candice is my full-time research assistant and works closely on three grants for which I am funded that are all related to HIV and syndemics in sexual and gender minorities and Black cisgender women.

Undergraduate

Lena-Sementa Weldemicael
University of Maryland

Summer 2023

Lena is working on an R15 project being trained to conduct research on syndemics and Southern Black women in the deep south.

Justin Nwosu

University of Maryland Summer Training and Research (UM-STAR) Program
Summer 2019

Justin is in the process of assisting with a literature review and write up for a manuscript that is in preparation on social networks, stigma, resilience and PrEP use among Black men who have sex with men (and women).

Ryan Trevino

University of Maryland Summer Training and Research (UM-STAR) Program
Summer 2017

Ryan assisted in an in depth literature review aimed at better understanding the current state of research on cardiovascular disease, depression and racial discrimination. Ryan was selected to present his project that was created under my guidance at the annual McNair Scholars Symposium as well as at De Paul's annual Science, Technology, and Math Undergraduate Research Fair. Ryan won an award for his poster at the 2018 Illinois Louis Stokes Alliance for Minority Participation Symposium.
